Healthcare  
App

# medifit.

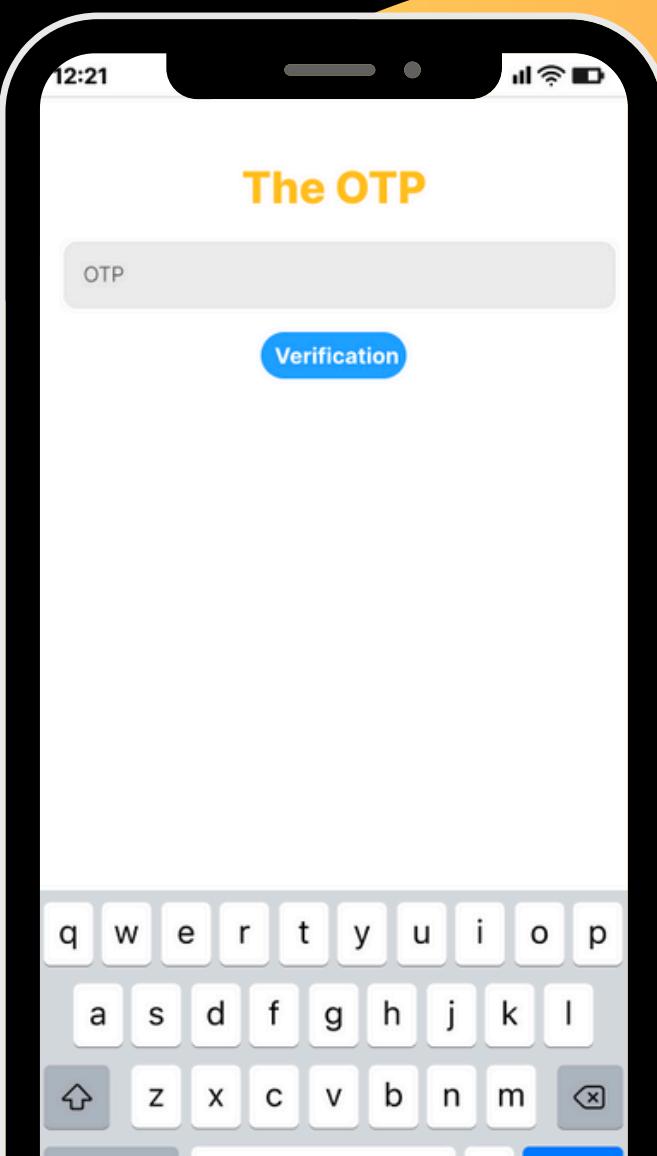

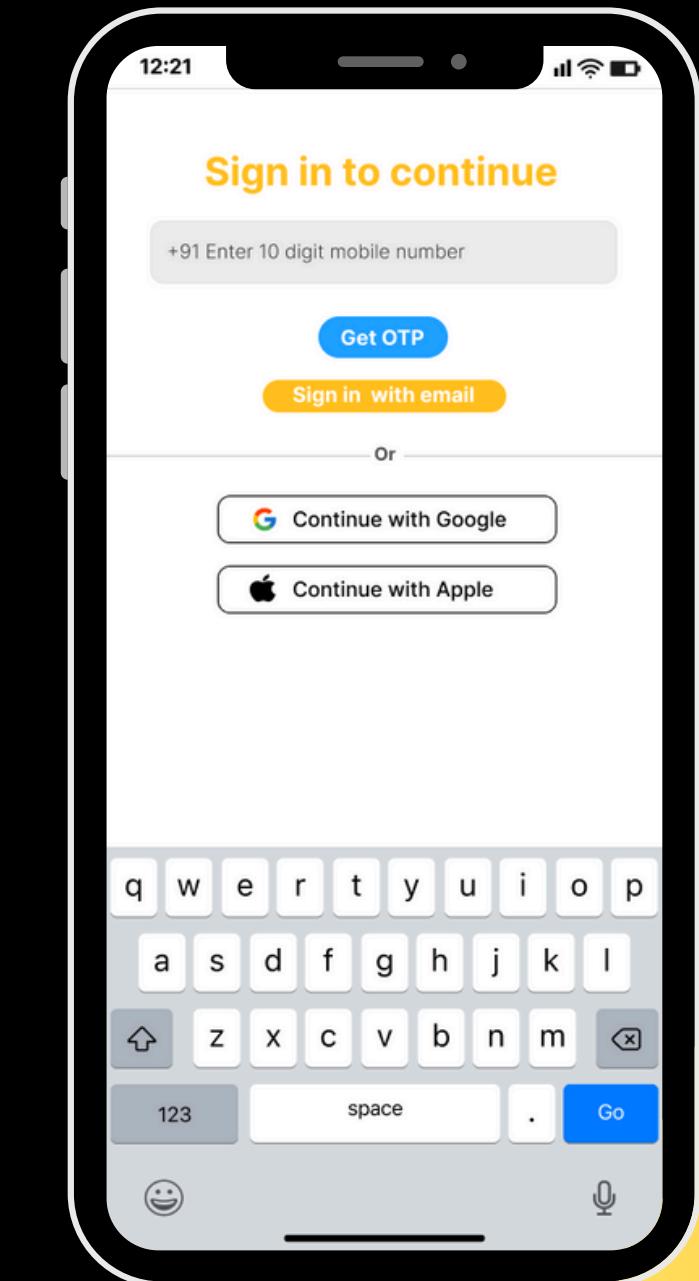

---

Medifit is a comprehensive healthcare app designed to simplify and enhance your health management experience. With a focus on quick service and innovation, Medifit empowers you to take control of your well-being.

# Sign in page

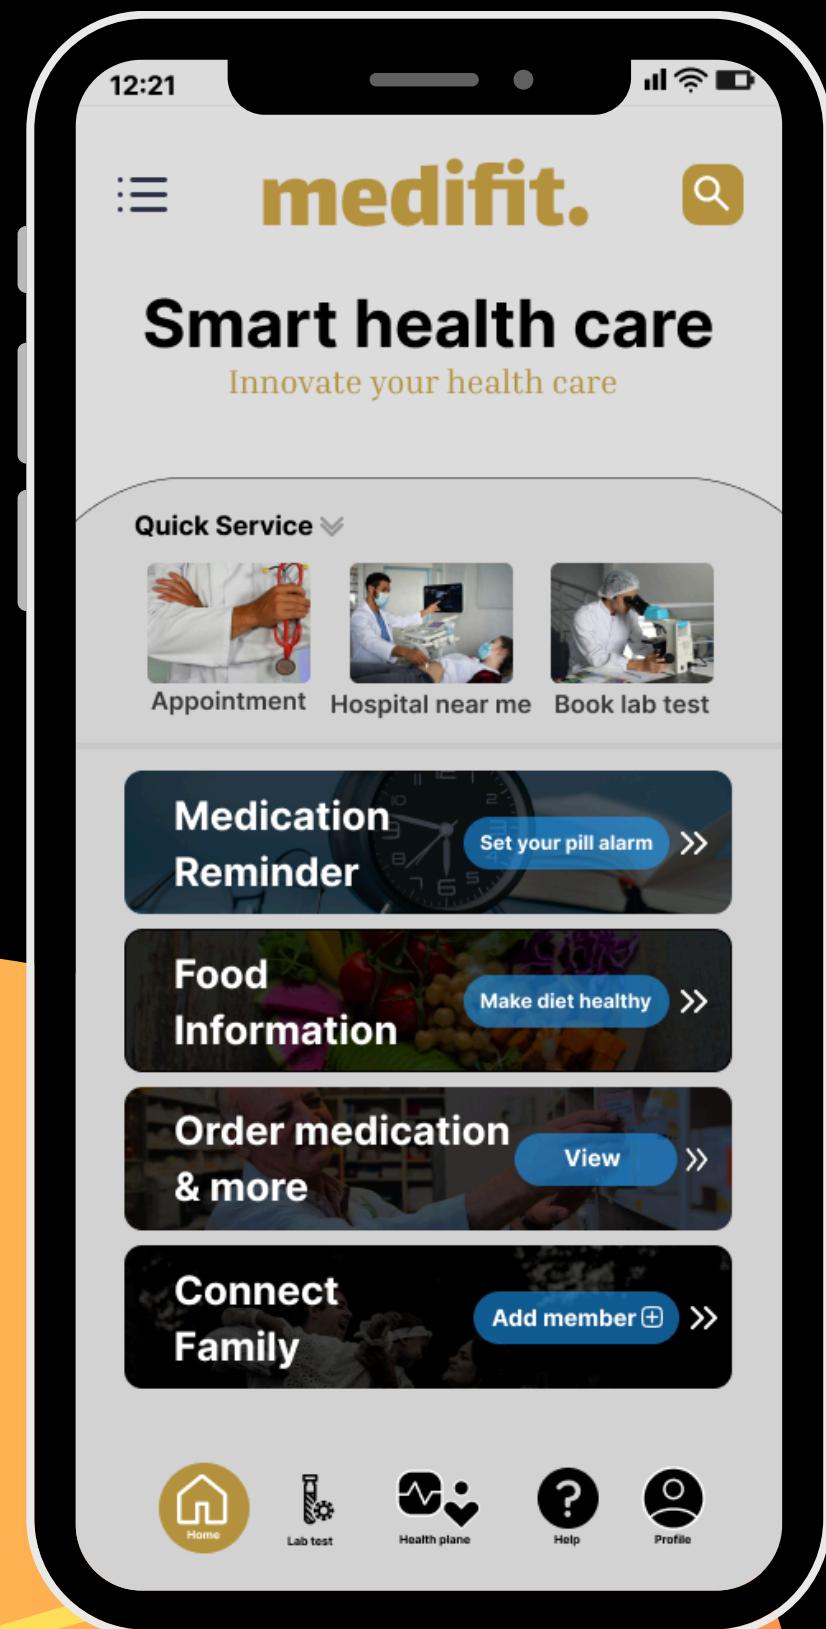

This is the sign-in page where clients can fill in the required information to join the MediFit community.

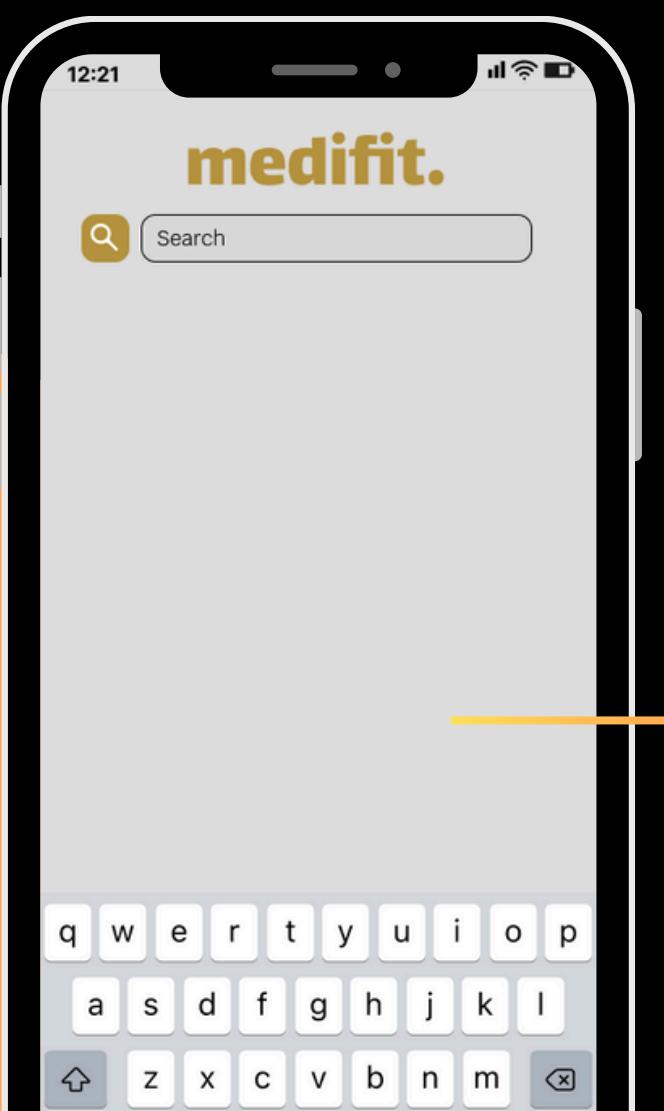

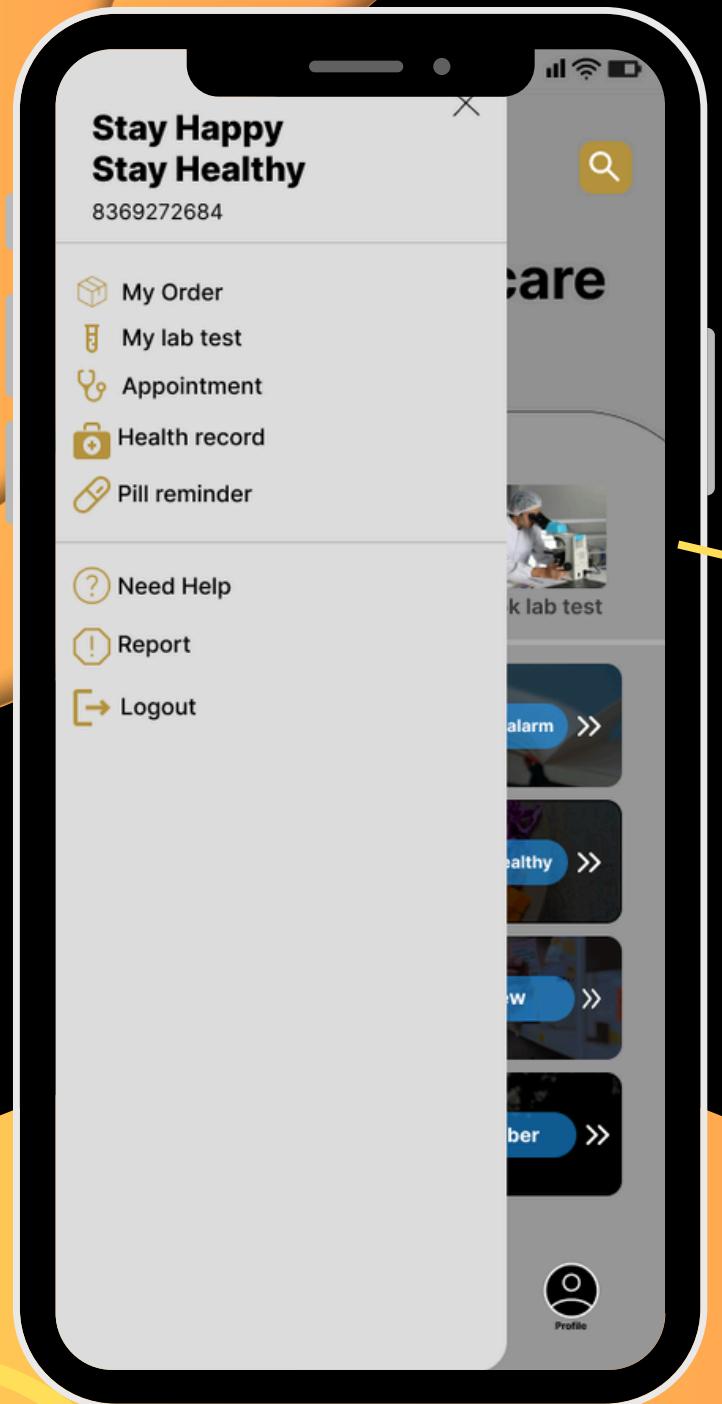

# Home page

---

The homepage contains a search bar, a menu section, and options for Appointments, Hospitals Near Me, Booking Lab Tests, Medication Reminders, Food Information, and Ordering Medicine.

# Search & Menu

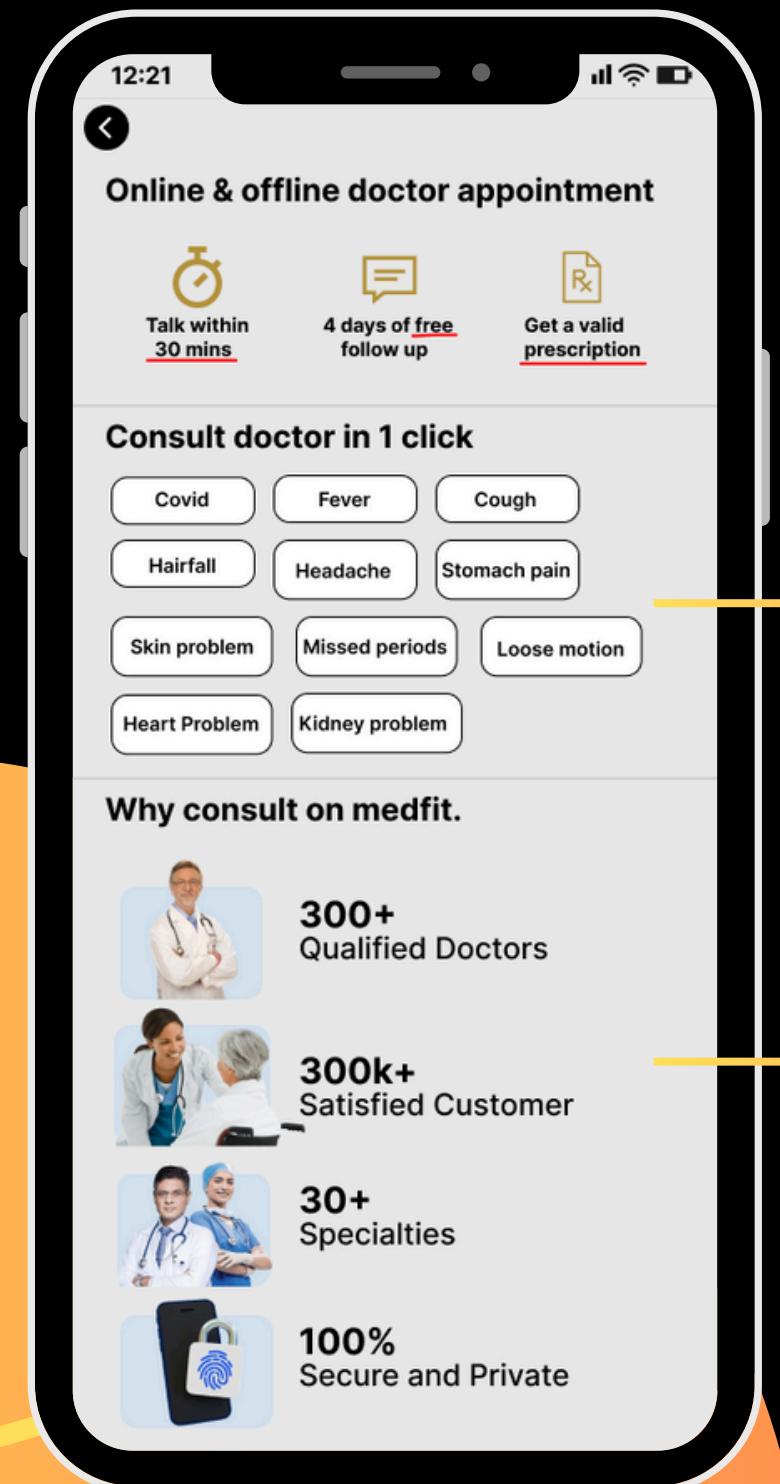

The menu section allows users to view orders, lab test records, booked appointments, and previous appointment details. It also includes sections for pill reminders, help, reports, and a logout option.

A search bar is provided to search for medicines, lab test information, or disease details.

# Appointment

---

We can also book appointments for various kinds of problems, such as fever, stomach pain, COVID-19, or skin problems.

There are specialist and well-qualified doctors, and all your information is secured and private.

# Order Summary & Payment

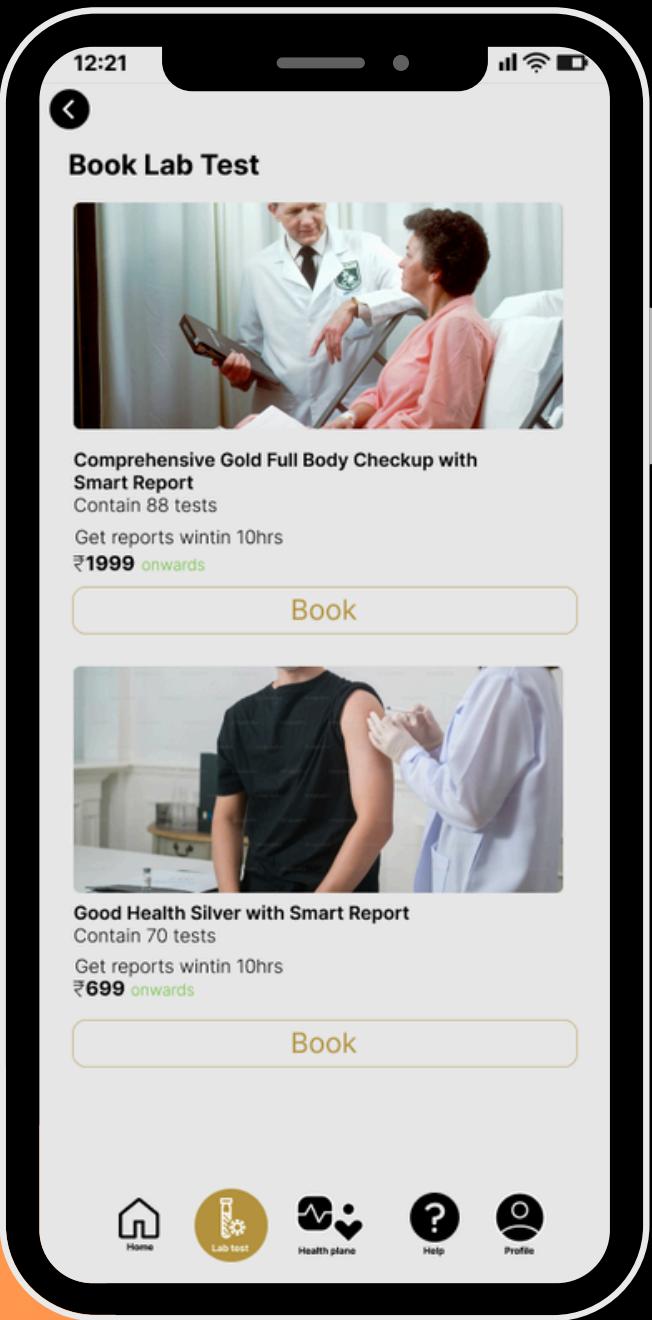

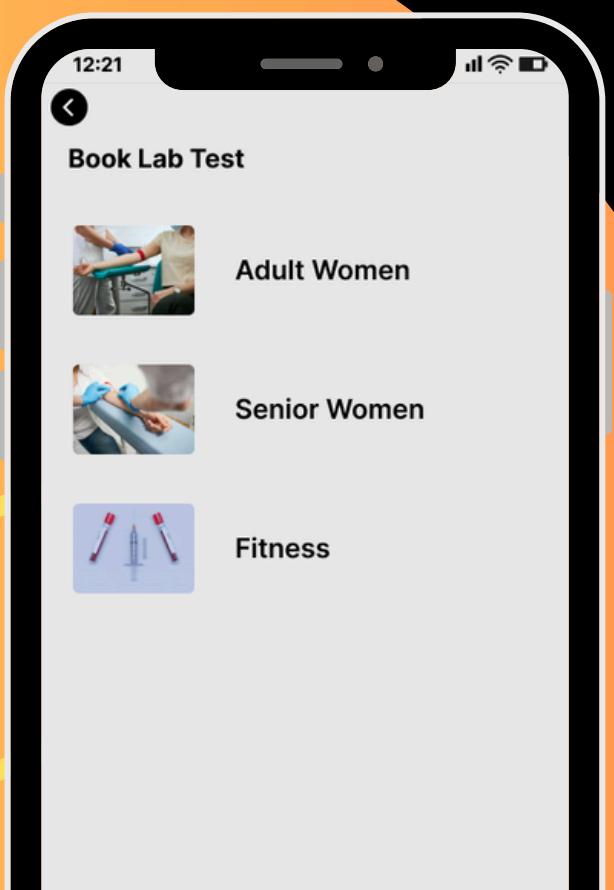

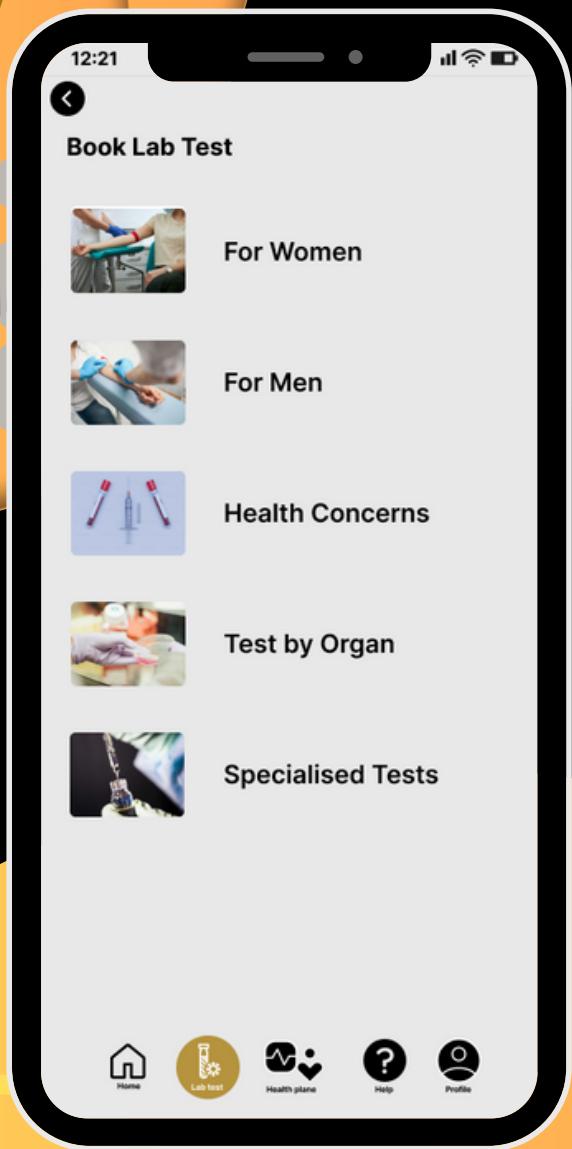

The image displays two screenshots of a mobile application interface. The top screenshot shows the 'Order summary' page. It includes fields for 'Patient name' (with an 'Add' button), 'Patient phone number' (8369272684, with an 'Edit' button), and 'What is your preferred mode of consultation' (Video, Audio, Chat). Below this is a 'Bill summary' section showing a Consultation fee of ₹369, Care plan membership of ₹165, a Discount of -₹369, and a 'To be paid' amount of ₹165. At the bottom, it shows a 'Total Amount' of ₹165 and a 'Proceed to pay' button. The bottom screenshot shows the 'Payment Details' page, listing UPI payment methods: G Pay (selected), Paytm, and an option to 'Add new UPI ID'. It also shows the 'Total Amount' of ₹165 and a 'Make Payment' button.

This is the order summary page where the symptoms are added to the order summary along with the patient's name, phone number, and the chosen mode of consultation

# Book lab

This app allows you to book lab appointments for blood tests and other body-related tests

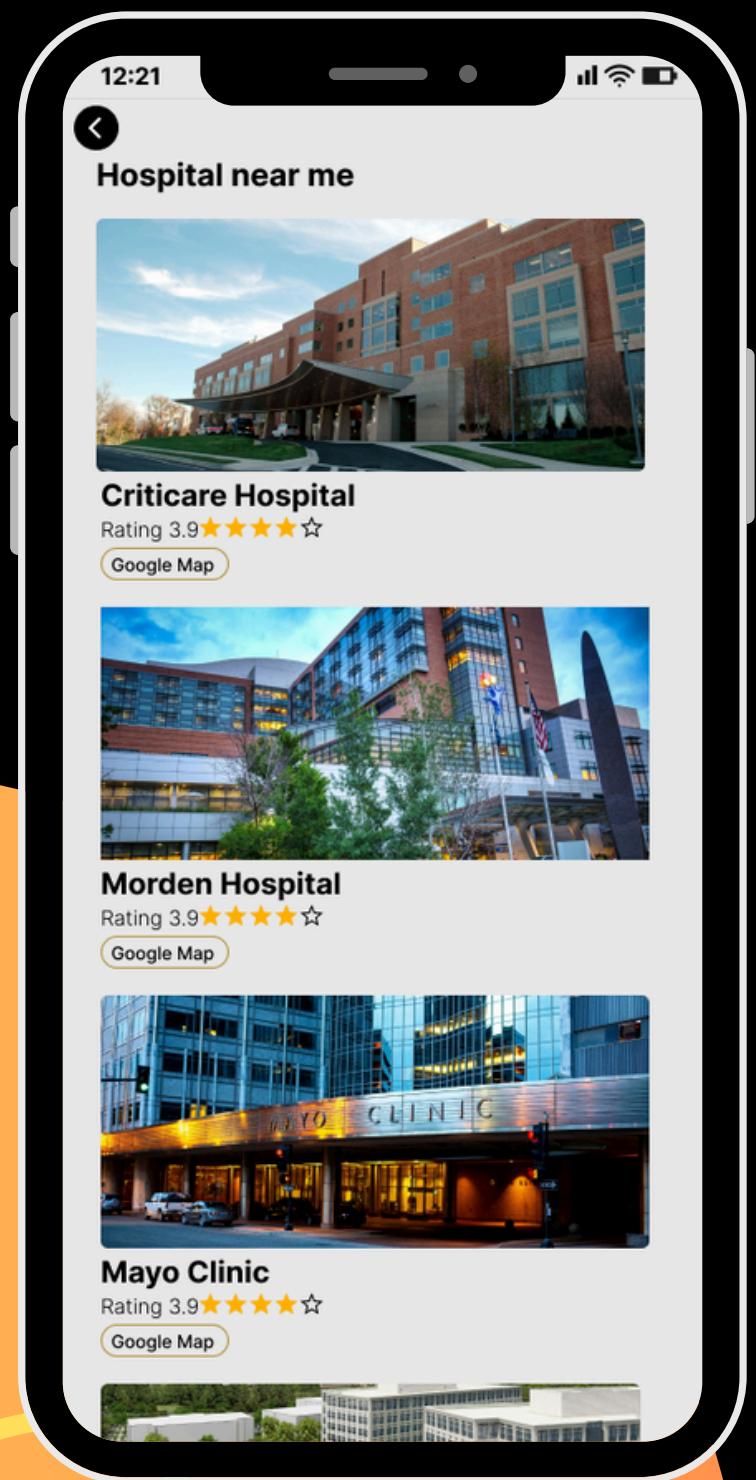

There are various types of tests available for everyone, from children to senior citizens.

# Hospital's near me

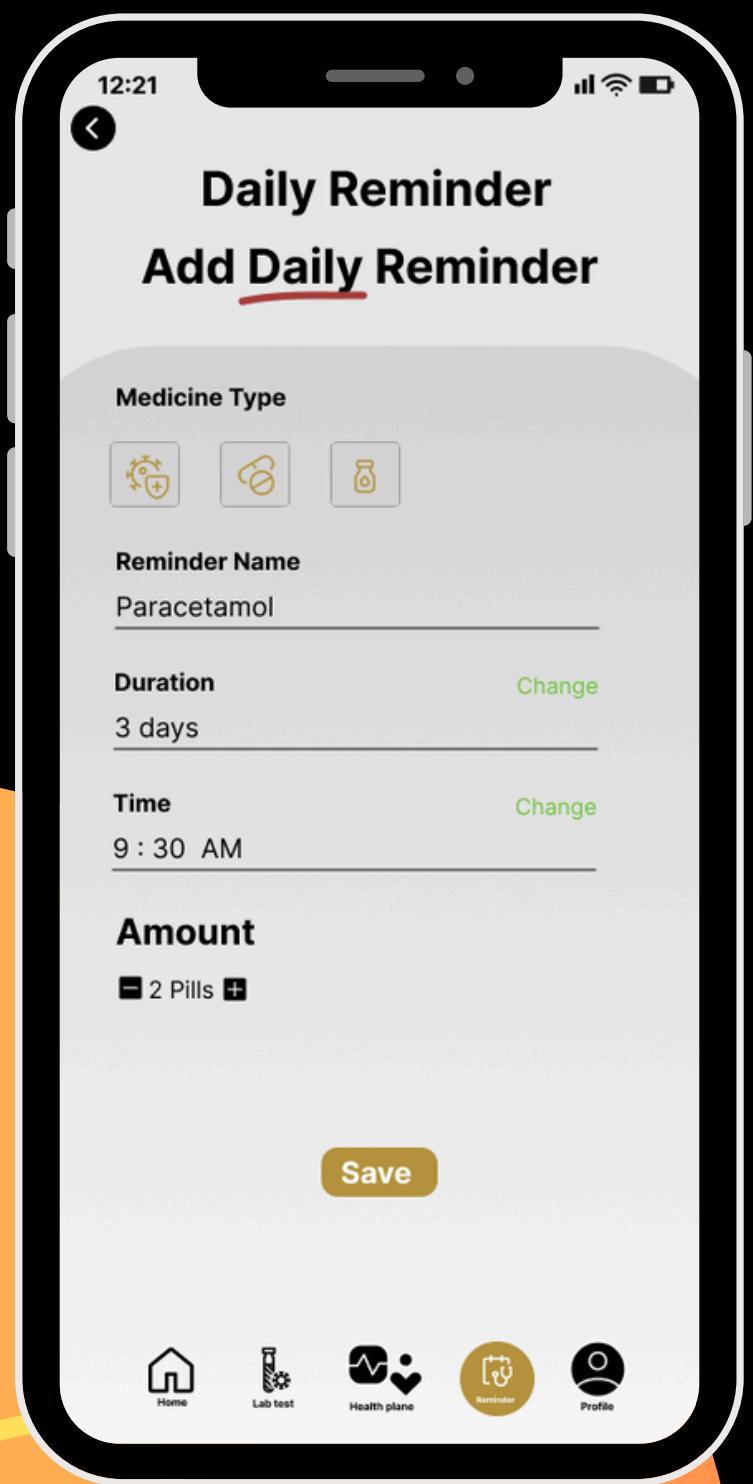

---

Information about nearby hospitals is also provided, and their locations can be found by redirecting users to Google Maps.

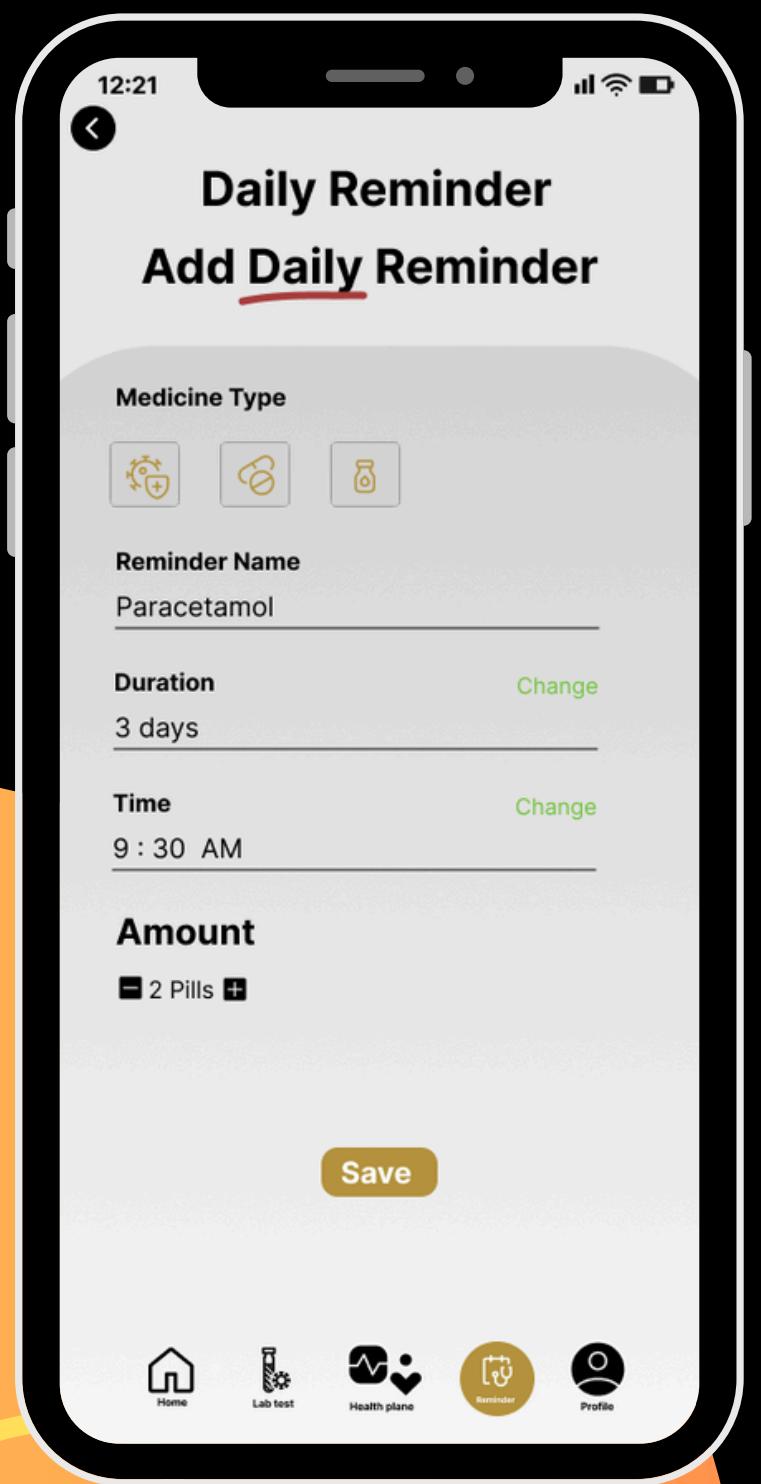

# Medication reminder

This app also offers a medication reminder system where you can add the medicine name, time to take it, duration of treatment, and dosage amount.
